EDUCATION

The Chinese University of Hong Kong

Master of Science in Financial Technology

Sep 2026 - July 2027

The Hong Kong University of Science and Technology

Bachelor of Engineering in Computer Science (Major CGA: 3.386/4.3)

Sep 2022 – July 2026

- University Scholarship, Dean’s List (Year 1 Fall & Spring Semester)

WORK EXPERIENCE

AIA Group

Jun 2026 – Aug 2026

AI Engineer Intern, IT Finance and Planning, Group Technology

- Built an end-to-end Python data pipeline that extracts, validates and consolidates IT financial data across 18 markets, , powering a HTML dashboard used by the Group CTO and senior IT leadership for strategic spend reviews.
- Integrated an LLM-powered analysis agent that automatically generates financial commentary, flags spending anomalies and produces governance-ready summaries across six key dashboard tabs, reducing manual review effort.
- Partnered with the Malaysia IT Finance Team to identify workflow bottlenecks and deliver automation solutions, including Excel template generation, and iterative dashboard enhancements based on evolving business requirements.

Chiyu Banking Corporation Limited (集友銀行)

Jun 2025 – Nov 2025

Fintech Intern, IT Development Team

- Developed a multi-agent chatbot that leveraged RAG to answer queries from internal documents, retrieve real-time financial news from trusted sources, and continuously update its knowledge base with a data ingestion pipeline.
- Implemented an automated web data pipeline to collect financial product information from competing institutions, ingesting the data into the chatbot's knowledge base to support up-to-date market intelligence and product comparison.
- Collaborated with cross-functional stakeholders and external vendors to evaluate enterprise AI, KYC and stablecoin solutions, supporting technology adoption and strategic decision-making.

Hospital Authority

Jun 2024 – Aug 2024

Data Engineering Intern, Private Cloud Team

- Implemented a Kibana monitoring watcher and dashboards to analyze log entries, enhancing system resilience with automated alerts for CPU usage exceeding 70% on remote servers.
- Extracted useful data from a large volume of unstructured log for integration into the dashboard system using Grok Pattern in Logstash.
- Automated backups of remote device configuration logs and developed a command-line tool for secure file transfers from remote devices to local systems using Shell scripting, protecting data security and reducing manual workload.

PROJECTS

Final Year Project (Generative AI tutor for Programming Courses)

Jun 2025 – Jun 2026

- Led system architecture, implementation and testing of an AI-powered course generation platform
- Developed a LangGraph-based multi-agent RAG pipeline to automate high-quality course material generation.

Crypto Exchange Market Data Stream Analyzer

Apr 2026 – May 2026

- Implemented a real-time data streaming pipeline that ingests cryptocurrency trade data from the Binance WebSocket API using Apache Kafka, stores time-series data in Redis, and exposes a FastAPI REST API for analytics.

Mobile Application Development Project (Cybersecurity)

Feb 2025 – May 2025

- Collaborated in a team to design and build an Android application enhancing cybersecurity by assessing the safety of URLs, Ips, domains, and file hashes with dashboard highlighting the most searched malicious URLs using Kotlin.

ADDITIONAL INFORMATION

Language:

Native in Cantonese, Fluent in Mandarin and English

Programming Language:

Python, C++, Java, Typescript, Kotlin, Shell Script

Technologies & Frameworks:

Github Copilot, LangGraph, LangChain, React, FastAPI, Spring Boot
